WHY?

beginners

are

perplexed

mostly

low quality

material

NO

end-to-end view

money minting

courses

What is AI and why is it important?

How to practice & build an AI portfolio?

How to prepare for the interview?

How to switch into an AI role (inside or outside)?

What is the difference between AI, ML, DL, DS, DM, BI?

What an end-to-end AI project looks like?

What are the roles in AI projects, who does what?

How to build a helpful network?

How to lead an AI initiative in your organization?

How to stay up to date in this ever-evolving field?

What AI concepts & tools you need to learn?

How to search for the job?

Which books, courses, channels, podcasts etc you need to refer to?
